IST 263 Project Milestone 4 – Wireframes

Name:

Description:
For my project, I want to create an educational platform where I can write, speak, and create art about certain topics I am passionate about. This site will be a blog, as opposed to a traditional portfolio, where I can create my own content instead of simply displaying content I've already made (as I would do in my portfolio). As a magazine journalism dual major, I love to spread awareness about topics I am interested in, whether it be the economy and finance, the environment and sustainability, or art/fashion and music. I would like to split up my website logically, having three different sections depending on the type of media I use. For example, I would have a section for my blog, one section on recommended music, and another section sharing/critiquing news, especially in fashion trends/art/music. Although a lot of work, I am willing to put in the effort for this site and create a platform that represents my interests while also informing and entertaining others.
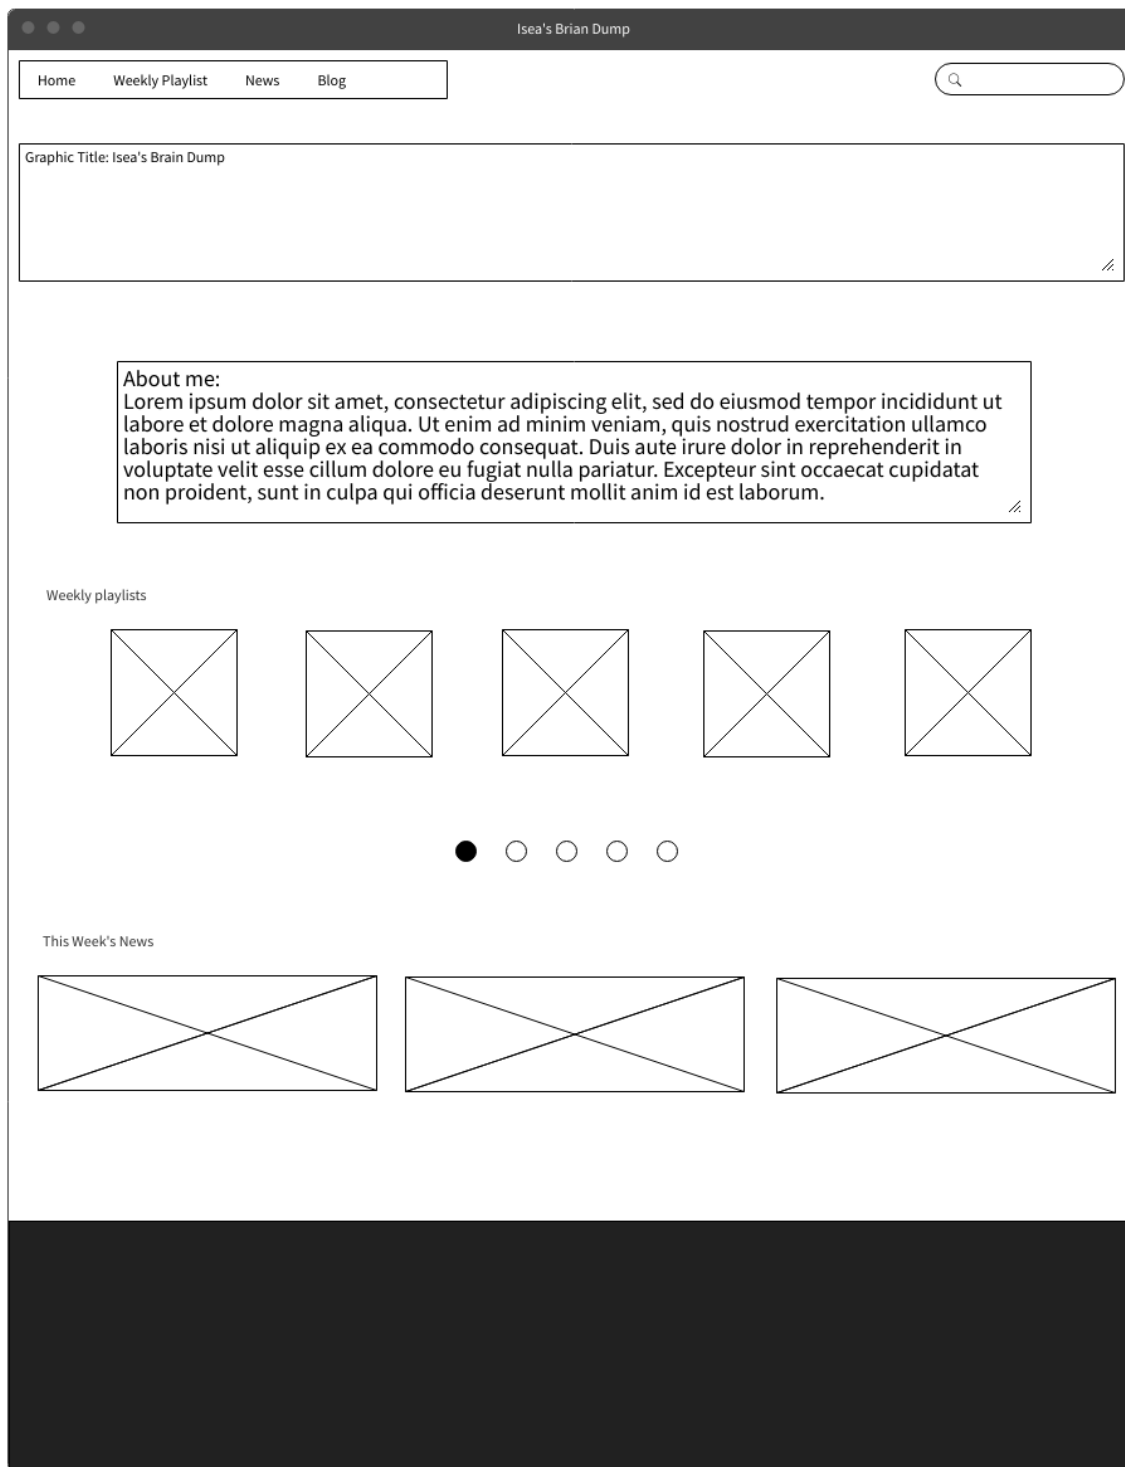

Research:

Write down the urls of three websites you looked at to research layout for the type of site you are creating. For example, if I was creating an auction website, I might look at pages on https://www.ebay.com/.

url1	https://margotlee.com
url2	https://gentwenty.com/about/
url3	https://goop.com

Wireframes:

Use MockFlow or another diagraming software to create layouts for your pages. Consider the following:

1. Where is your navigation going to be located on every page.

2. Will you need a footer?

3. How can you make a layout that is visually interesting and helps communicate your site content?

4. Don't forget you must have at least 2 distinctly different page layouts.
